The company has reported a decline in profitability, with PBDIT going down to Rs.436.58 lacs for the year 2011-12 compared to Rs.1166.88 lacs for the year 2010-11. MANAGEMENT DISCUSSION AND ANALYSIS**OVERVIEW**

The recovery which started in the textile sector in previous year could not be sustained during the year under review. High cost of finance, liquidity crunch, high inflation and depreciation of Rupee affected economic growth. The actual GDP growth rate fell short of projections. Industrial production suffered due to these adverse factors. The textile industry was also hit, with volumes and margins declining.

Cotton prices continued its upward rise during this year. Further, there was inflationary trend in all major cost elements like dyes and chemicals, utilities as well as overhead expenses. Inflation has affected the buying power of the consumers, leading to sluggish demand. Increased cost could not be passed on to fabric buyers due to stiff resistance against hiking of fabric prices in the prevailing market scenario. As a result, profitability of the company was adversely affected.

SEGMENT ANALYSIS AND REVIEW

The company has continued to operate only in one segment i.e. Textiles. The different products within textiles in which company has its presence are discussed below:

Denim:

Denim division recorded substantial downturn in performance for the year under review due to lower demand, increase in cotton cost and inflationary trend in other costs. The company could not pass on the burden of higher costs by adequately increasing the fabric selling prices, as the market was sluggish. Capacity utilisation and volumes both declined due to adverse market conditions. As a result, the division could not report positive operational profitability for the year.

Spinfab:

The division has reported substantial fall in its profitability due to adverse market conditions, which affected capacity utilisation and volumes. While costs went up due to high inflation, the division could not increase prices to offset the cost burden as the markets remained subdued and selling prices were under pressure. Yarn prices softened during the year, but the benefit was more than offset by steep rise in other costs. As a result of all these negative factors, the operational profitability for the year suffered.

Attires:

The profitability of the Attires division has improved during the year under review on account of better sales realisations.

FINANCIAL RESULTS AND OUTLOOK:**Financial performance:**

The year under review saw extraordinary pressure on profitability of the company due to combined impact of higher costs and lower volumes and margins. Higher cotton prices as well as rise in almost all other costs including dyes and chemicals, utilities and overheads had adverse impact on margins. Fabric market witnessed lower demand amidst reduced purchasing power of the consumers, thus limiting scope for offsetting higher costs by raising fabric prices. As a result, the operational profit of the company has fallen compared to the previous year.

The operational profitability of the company has gone down to Rs.436.58 lacs as compared to Rs.1166.88 lacs in previous year.

Raw material:

The rise in cotton prices during the year has continued during the year review, putting profitability of the company under pressure. Since the company has been facing working capital constraint, it has to bear more

severe impact of price rise in raw materials, as it cannot take advantage of lower prices during season. Yarn prices have reduced slightly during the year.

Dyes and Chemicals:

The prices of all dyes, chemicals and consumables have continued to rise during the year, resulting into higher costs.

Utilities:

Utilities cost has increased significantly during the year due to hike in power tariff as well as higher coal prices.

Other Manufacturing expenses:

Overall cost of job work has gone down due to lower volumes. Cost of spares consumption has reduced considerably during the year.

Interest:

Interest cost, which includes mainly interest paid to overdue trade creditors, has gone up during the year under review. The company has not made provision for unpaid interest on secured debt and unsecured debt, considering the ongoing comprehensive debt restructuring. It is only when the debt restructuring is completed that the actual interest cost would be known. It is expected that the debt restructuring exercise would take into consideration the earning capacity of the company and existing situation of the textile industry.

Outlook:

The present economic situation at global level as well as in India is not conducive to any improvement in business performance. The European economies and their issues continue to fuel uncertainty and caution in world markets, affecting demand. Indian economy has been witnessing growth slowdown, high inflation and liquidity crunch. The situation is not likely to improve much in medium term. Further, the recent proposals for changes in trade policy with our neighbouring countries with respect to allowing better access to them to Indian markets may put the domestic textile industry at disadvantage. The permission recently granted by the Government to export cotton will reduce availability of cotton in domestic market and push up its prices, affecting profitability of the company. These factors are likely to adversely affect the performance of the company in terms of both volumes and profitability.

RESOURCES AND LIQUIDITY

The decline in operational profitability has created stress on the resources of the company, especially on its working capital management. The funds constraint has prevented the company from making any fresh investment for machinery upgradation and product development, affecting performance of the company.

The company continues to face the problem of high level of debt which is affecting the operations of the company. It is imperative that the debt restructuring exercise be effectively concluded for the liquidity position of the company to improve, which in turn can bring about better operational performance.

OPPORTUNITIES

The company is continuously striving to boost its performance by focusing on better operational productivity and effective cost management on one hand and market development on another. The global market scenario may improve for the Indian textile industry, with decline in fabric exports from China. This could be a big opportunity for Indian textile industry to boost its exports.

THREATS

The company is facing serious challenge on cost front, as inflation continues to impact almost all elements of costs. Fabrics market is not in a position to absorb any price hike that may potentially offset higher cost burden. Volumes are not likely to improve either, as demand is not expected to pick up in short term. These

factors may affect the performance of the industry in future. The plant and machinery of the company are very old and the company would have to incur higher cost on repair and maintenance of the same.

INTERNAL CONTROL SYSTEMS

The company has adequate internal controls encompassing all business processes to ensure efficiency of operations, compliance with internal policies and applicable laws and regulations, protection of resources and assets and accurate reporting of financial transactions. The adequacy and effectiveness of the internal control systems is reviewed by the audit committee of the board, which suggests improvements for strengthening them. The present internal control system is adequate considering the size of the company and nature of its operations.

RISKS AND CONCERNS

Cotton is the main raw material for the company. Being an agro commodity, it has high risk of supply fluctuations due to variations in crop volumes, which also lead to volatile price movements. Government policies play significant role in price movements of cotton. Cotton prices have continuously surged in the last few years, which have affected profitability of the company. The company is also exposed to fluctuations in the currency, which have an impact on export sales realisation and profitability of the company. Inflation affects cost-competitiveness of the company in global markets. The company also faces other risks like economic slowdown, change in government policies etc. that affect the business of the company. The decision of the Government to accord special status and better access to Indian markets to Pakistan and Bangladesh would severely affect the domestic textile industry.

RESEARCH AND DEVELOPMENT

The company has consistently maintained its focus on research and development, especially product development, to remain competitive and to offer products that meet customer expectations. In spite of high costs, the company has set up modern product designing and development facilities. The company also ensures that its products meet high quality standards.

HEALTH, SAFETY AND ENVIRONMENT

It has always been a matter of high priority for the company to ensure good health, safety and welfare of its workers and employees. Adequate steps have been taken and further improvements are made on continuous basis aimed at safe and comfortable working conditions of workers. The safety committee of the company has been taking various initiatives in the matter from time to time. The company also complies with regulations relating to environment and emission norms.

HUMAN RESOURCES DEVELOPMENT

The company attaches significant value to its human resources and follows effective policies and practices to protect and enhance it. It has been consistently successful in retaining and nurturing talent even during lean periods by adopting proper and adequate measures aimed at enhancing employee satisfaction and welfare.

CAUTIONARY STATEMENT

Statements in the directors' report and the management discussion and analysis containing the objectives, expectations or predictions of the company may be forward-looking within the meaning of securities laws and regulations. Actual results may differ materially from those expressed in the statement. The operations of the company could be influenced by various factors such as domestic and global demand and supply conditions affecting sales volumes and selling prices of finished goods, input availability and cost, government regulations, tax laws, economic developments within the country and other factors such as litigation and industrial relations.

As regards deferred tax as per Accounting Standard - 22 (AS-22) on "Accounting for Taxes on Income" issued by The Institute of Chartered Accountants of India, there is a net deferred tax asset for the past years and for the current year after adjusting unabsorbed depreciation and carry forward losses of the past years. The Income-tax assessments of the company are completed up to A.Y. 2010-11. In respect of assessment for A.Y. 1996-97, income-tax department had disputed some of the claims and raised demand of Rs. 676.66 lacs for tax and interest. 36. Export benefits/incentives in respect of duty draw back and purchase of raw material from local suppliers (against advance released orders under duty exemption scheme) are accounted on accrual basis in order to follow the system of accounting which is mandatory as per the provisions of Section 209 of the Companies Act, 1956.
37. The cost of purchase is arrived at after considering effect of any settlement reached with the suppliers during the year.
38. In view of ongoing comprehensive debt restructuring, the company has not made provision of Rs.23,442.98 lacs for unpaid interest (Previous year Rs.19,989.04 lacs). The loss for the year is understated by Rs. 23,442,98 lacs (Previous year Rs. 19,989.04 lacs).
39. The unsecured loans include Rs. 750.00 lacs in the suspense account representing amount of a cheque drawn on HDFC Bank given by the company to Bank of Bahrain & Kuwait (BBK) and paid to BBK by clearing house because of the delay by HDFC Bank in returning the cheque to BBK. The dispute is the subject matter of notice correspondence between HDFC Bank and BBK and under dispute between the company, BBK and HDFC Bank in various courts.
40. Exceptional item represents amount of compensation paid to workers for voluntary retirement. Extraordinary items for the previous year mainly include balances written off.
41. The expenditure incurred in respect of assets damaged for which insurance claim has been received has been debited under respective heads.
42. The net worth of the company has eroded. However, the company expects to revive its financial position in view of the ongoing debt restructuring and good prospects of improvement in its operational performance in future. Considering these facts, the accounts of the company are prepared on going concern basis.
43. Names of small scale industrial undertakings in whose account amount was outstanding for more than 30 days are as under:
