Under his leadership, the Company established itself strongly in the domestic and international markets as a supplier of quality fabrics. In the recent years, the Company has been passing through difficult times due to various adverse factors. Under his able leadership, the Company successfully carried out the comprehensive secured debt settlement with the secured creditors of the Company by way of Scheme of Amalgamation & Reconstruction under section 391 of the Companies Act, 1956 which was sanctioned by the Honorable High Court of Gujarat. Further he has been steering the Company with focus on innovation and operational efficiency. III. Other Information:

Reasons for loss or inadequate profits:

The various reasons for the present performance have been highlighted in the Board's Report and the Management Discussions and Analysis for the year ended 31.03.2017. The Company posted profit in terms of a gain on account of sale of a part of surplus land of the Company in order to part-finance the settlement of the secured debt of the Company in accordance with the Scheme of Arrangement, as sanctioned by the Hon'ble High Court of Gujarat. On the operational front, the performance is marginally down with loss at PBT level.

The performance of the Company has remained almost unchanged during the year as compared to the previous year. The rising competition and strengthening rupee hit the product volumes and the top-line of the Company adversely and resulted into strained margins and lower volumes. However, reduced interest burden on account of repayment of the loans offset the adverse impact of the above and the bottom-line remained almost at the same level of the last year.

The Company's technological limitations in terms of offering wider product range or better product differentiation continue to add to the challenges faced by it. The rising competition and strengthening rupee hit the product volumes and the top-line of the Company adversely and resulted into strained margins and lower volumes.

IV. Steps taken or proposed to be taken for improvement:

The Company successfully completed its secured debt restructuring exercise through the Scheme of Arrangement as stated in the Board's Report. The Company has now undertaken a comprehensive exercise for operational restructuring. An overhaul of the existing manufacturing setup along with introduction of newer machines is under implementation which will improve technical capabilities, reduce bottlenecks and enhance customer servicing setup. The changed scenario shall enable the Company to operate in a high value-added market segment and offer an improved product basket and it would be a challenge for the Company to translate the same into an improved operational performance going forward. The Government of India has approved several measures for textiles and apparels during the year. The growing Indian economy and rising disposable income will render a strong tailwind to the textile sector.

BOARD'S REPORT

Your Directors take pleasure in presenting the Thirty Fourth Annual Report of your Company together with audited Financial Statements for the year ended on 31st March, 2017.

1. FINANCIAL RESULTS

Your Company's performance during the above year is summarized below:

Particulars	(Rupees in Lacs)	
	March 31, 2017	March 31, 2016
Profit / (Loss) before interest, depreciation, extraordinary item and tax	(1,375.66)	(752.43)

Profit / (Loss) before depreciation, extraordinary item and tax	(2,253.58)	(1,972.41)

Profit / (Loss) before extraordinary items and tax	(2,606.62)	(2,355.77)
Add: Extraordinary item (income)	5,255.17	-
Profit/(Loss) before tax	2,648.55	(2,355.77)
Less: Tax Expenses	41.04	-
Profit/(Loss) after tax	2607.52	(2355.77)

2. DIVIDEND

Your Directors regret their inability to recommend any dividend on the equity shares in view of the carried forward losses of earlier years. They are also unable to pay any dividend on preference shares.

3. RESERVES

In view of the accumulated losses of earlier years, no amount has been transferred to general reserve.

4. REVIEW OF BUSINESS OPERATIONS AND FUTURE PROSPECTS

For the year under review, the Company earned profit before tax of Rs. 2648.55 lacs, which included extraordinary income of Rs. 5255.17 lacs being profit on sale of part of surplus land to finance debt settlement. Excluding this income and non-recurring expenses of Rs. 733.46 lacs, loss before tax of Rs.1873.16 lacs reflects marginal decline over comparable figure of loss of Rs. 1813.33 lacs of previous year, after netting off non-recurring expense of Rs. 542.44 lacs. Operational performance could not match that of previous year. There was considerable fall in volumes of Denim Division as sales to certain segments fell. Spinfab Division profitability also declined as it could not sustain margins by protecting volumes in market segments like brands where margins are high. A combination of adverse factors like product offering limitations of the Company, adverse market conditions, upswing in yarn prices and substantial fall in saving in power cost through purchase of power from open access system led to deterioration in performance.

On the other hand, several positive factors offset the fall in performance. The slide in Denim Division performance was to some extent contained by undertaking more jobwork in Denim Division. Wage bill was lower upon closure of spinning activity and implementation of VRS. Interest cost was lower due to repayment of certain loans.

A detailed discussion on performance appears as part of Management Discussion and Analysis attached to this report.

It would be pertinent to note that the Company has been facing competitive disadvantage in the market due to its old machinery which restricts product portfolio and hampers cost efficiency. The Company has initiated modernization on a moderate scale, as permitted by its resources, to be in a better position to face the market and improve its performance.

**5. SCHEME OF ARRANGEMENT**

It was reported in the Board's Report for the financial year ended on 31st March, 2016 that the Hon'ble High Court of Gujarat vide its Order dated 24.09.2015 sanctioned the Scheme of Arrangement for reconstruction and compromise between the Company and its equity shareholders, preference shareholders and secured creditors ("the Scheme") and the same became effective from 5.10.2015.

Your Directors are pleased to report that the Company has paid entire secured debt (including the deferred payments) as settled in terms of the Scheme.

6. SHARE CAPITAL

During the year under review, the paid-up Equity Share Capital increased to Rs.12845.39 lacs on account of allotment of 8,00,85,089 equity shares of Rs.10/- each made under Rights Issue to the Shareholders of the Company and 1,50,00,000 equity shares allotted to the Secured Creditor pursuant to Scheme of Arrangement u/s 391 to 394 of the Companies Act, 1956.

7. MATERIAL CHANGES AND COMMITMENT, IF ANY, AFFECTING THE FINANCIAL POSITION OF OUR COMPANY OCCURRED BETWEEN THE END OF THE FINANCIAL YEAR TO WHICH THIS FINANCIAL STATEMENTS RELATE AND THE DATE OF THE REPORT

MANAGEMENT DISCUSSION AND ANALYSIS

OVERVIEW

In the aftermath of major economic and political developments during the last year, the world economy faces considerable uncertainty. The current year experienced moderation in general price level, with significant decline in the price of Indian basket of crude oil and commodity prices. The Indian economy witnessed a phase of stagnancy during the year under review as the pace of policy changes slowed down. Uncertainty on account of significant external political developments, global interest rate behaviour, US election and capital flows posed potential downsides. Economic growth was supported by good monsoon rains and crop production and the expansion in Government expenditure due to payouts because of the Seventh Pay Commission. However, Current Monetary Policy, uncertainty around commodity prices, especially that of crude oil, globalization of goods, services and people are the three major challenges for the economy. The government policies world over are shifting more towards protectionism, posing a greater challenge to international trade.

India's textiles sector is one of the oldest industries in Indian economy and is one of the largest contributors to India's exports with approximately 11 per cent of total export. During the year under review, textile demand remained sluggish, following uncertainty in global economy. Rising output costs hit textile export which contracted in calendar year 2016 for a consecutive second year due to weak global demand and India's losing competitiveness. India has been losing its competitiveness to China, due to almost flat cost of production there and depreciation in their currency. In contrast, the cost of production had increased sharply in India over the past year. Additionally, the sharp appreciation in rupee during the later part of the year added to the challenges faced by this fragmented and unorganized segment. At the same time, demonetization of the currency as well as implementation of Goods and Services Tax (GST) may augur well for the economy in terms of spurring growth, competitiveness, indirect tax simplification and greater transparency.

Under the circumstances, textile Industry maintained a negative outlook on textiles for FY17 on continuing overcapacity, falling capacity utilisations and dumping from China. The pace of growth for other Asian apparel exporters like Bangladesh, Cambodia, and Vietnam has also moderated though their growth was better. Scrapping of the proposed Trans Pacific Partnership (TPP) has weakened the prospects for Vietnam, which augurs well for India.

In the backdrop of volatile macro-economic circumstances, the performance of the Company has remained almost unchanged during the year compared to the preceding year. The rising competition and strengthening rupee hit the product volumes and the top-line of the Company adversely and resulted into strained margins and lower volumes. Company's technological limitations in terms of offering wider product range or better product differentiation continue to add to the challenges faced by it. However, reduced interest burden on account of repayment of the loans offset the adverse impact of the above and the bottom-line remained almost at the same level of the last year. The reduction in volumes was steeper for the Denim division where the exports as well as garment exporter segment witnessed significant erosion in volumes. The Spinfab division, on the other hand, saw margins coming under pressure on account of increasing competition and its inability to offer wider product range. The management is taking steps to overcome technical limitations of the Company in terms of product offerings. Considering the resource crunch, the new investments are planned in a strategic direction and with a greater focus on areas that can enhance product capabilities, enable it offer better value-added products and improves operational flexibility in the most economic manner.

SEGMENT ANALYSIS AND REVIEW

The Company operates only in one segment i.e. Textiles. The different products within textiles in which Company has its presence are discussed below:

Denim Division:

Denim Division reported subdued performance in light of adverse market scenario aggravated by its own constraints with regard to product and customer baskets. Volumes for exports as well as domestic markets took a hit with reduction in domestic volumes being steeper as the garment exporter segment was badly hit from domestic as well as global conditions. The changing customer trend towards dense product varieties also shrunk

the volumes in meter terms. The basic and simple product range of the division makes it more difficult for the division to face the stiffer competition. At the same time, volatile market conditions also had a significant impact on the product volumes. The division tried to work on some innovative solutions and focused on certain job work orders thereby reducing the effect of lower volumes. Reduced fixed costs mainly because of lower wages upon closure of spinning activity during the preceding year helped the division reduce the losses to some extent. Efforts are under way to improve the product offering and competitiveness going forward.

Spinfab Division:

The Spinfab division's business is more focused on domestic market segment. The division show a decline in the volumes, especially in the Brand segment where complex products and smaller lot-size are the driving factors. This segment offers much better margins compared to the other segments, however the division has its own limitations also in these areas. By taking a few innovative steps, it had been possible to improve the brand business significantly during the preceding year but the momentum could not be sustained during the year under review. The margins as a result have taken a beating. New investment plans are under way and are aimed to significantly improve the product capabilities of the division.

Brand Business and others:

The activity reported improved performance on account of higher volumes of piece-dyed orders, both from domestic as well as export markets. The brand volumes however declined due to a bearish retail market scenario. The ready-to-stitch product market continues to shrink mainly because increased tendency towards ready made garments.

FINANCIAL RESULTS AND OUTLOOK:**Financial performance:**

The Company has reported a profit of Rs. 2648.55 lacs for the year at PBT level compared to a loss of Rs. 2355.77 lacs in previous year. The performance for the year includes Rs. 5255.17 lacs being an exceptional and extraordinary item in terms of gain on account of sale of a part of surplus land by the Company in order to part-fund the settlement of secured debt. The operational performance is marginally down with the loss at PBT level being at Rs. 1873.16 (arrived at after adjusting reported PBT for non-recurring expenses (net) of Rs. 733.46 lacs) compared to loss of Rs. 1813.33 lacs in year 2015-16 (adjusted for non-recurring expenses (net) of Rs. 542.44 lacs). Reduced interest cost by Rs. 342 lacs is one of the major reasons for change in performance. On the operational front, the performance of Spinfab division suffered mainly due to reduced margins. The Denim division witnessed significant lower volumes however the bottom-line did not suffer as the fixed costs remained under control and went down.

Raw material:

The yarn prices have been on the rise during the year riding on steep increase in the cotton prices. The year under review show a reversal of trend in the prices of cotton and yarn which had softened during the preceding year. The prices trended higher since the beginning of the season and remained firm during the later part of the year. Higher yarn prices resulted into increased pressures on the product margins as it was not possible to fully pass on the impact.

Dyes and Chemicals:

Expenditure on dyes and chemicals has remained under control and has reduced mainly on account of reduction in volumes. Prices of the dyes and chemicals have remained stable due to slack demand in the national and international markets. As a result, the costs in terms of per meter of fabric have also remained almost unchanged compared to the preceding year.

Utilities:

Utility costs have reduced in terms of lower production volumes, however the costs per meter of fabric has increased marginally. The gains on sourcing of power through open access system has reduced substantially during the year due to steep increase in cross subsidy charges. The fuel prices also hardened during the later

part of the year on account of Indonesian coal prices going up sharply in the backdrop of increased demand from China. The Company could however mitigate the impact by changing specifications of coal so as to optimize the generation cost per unit of energy.

Other expenses:

Other manufacturing expenses have reduced during the year in line with reduced production volumes. Moreover, consumption of stores and spares has also gone down due to lower capacity utilization and discontinuation of spinning activity. Fixed costs have reduced mainly on account of lower wages consequent to closure of spinning activity during earlier year.

Interest:

The Company repaid the entire balance of secured debt as provided in the Scheme of Arrangement. The Rights Issue proceeds also helped the Company reduce the interest burden. Accordingly, the interest cost has gone down during the year.

Outlook:

The global textiles trade is presently passing through a significant trajectory. China's predominance in the textile trade is gradually waning, presenting new opportunities for India to up its market share. Fast emergence of new textile manufacturing hubs like Vietnam, Bangladesh etc. can impact India's calculation in a changing market, driven by market access and policy support given by the respective governments to empower the textile chain. Also, emerging regional trading agreements like Trans Pacific Partnership (TPP), Trans-Atlantic Trade & Investment Partnership (TTIP) etc. can script a paradigm shift in the future trade and investment flows.

As per the Research Report of India Rating and Research (Ind-Ra) Cotton textiles may see stability in the next financial year. The research agency revised its cotton outlook to stable for financial year 2018 from negative for financial year 2017. The expectation is in view of continued auction of Chinese reserves and global cotton processing countries (excluding China) holding about six months of inventory and also of positive impact of GST on Cotton Textiles.

India has vast potential to grow in many textile segments. The 'Make in India' campaign launched by the government would provide boost to the Indian textile industry and enable it achieve 20% growth in exports and sustain 12% growth rate in domestic market till 2024-25 as suggested by report of expert committee on Vision, Strategy and Action Plan for Indian Textiles and Apparel Sector. The Government has approved several measures for textiles and apparels during the year. The growing Indian economy and rising disposable income will render a strong tailwind to the textile sector. However, uncertainty around current monetary policy and the commodity prices as well as likely impact of the GST implementation may pose a major challenge at the macroeconomic level.

On the Company's front, post successful completion of the debt restructuring through the Scheme of Arrangement, the Company has undertaken a comprehensive exercise for operational restructuring. An overhaul of the existing manufacturing setup along with introduction of newer machines is under implementation which will improve technical capabilities, reduce bottlenecks and enhance customer servicing setup. The changed scenario shall enable the Company to operate in a high value-added market segment and offer an improved product basket and it would be a challenge for the Company to translate the same into an improved operational performance going forward.

RESOURCES AND LIQUIDITY

The Company has been facing major structural handicap with the old plant and machineries and operational bottlenecks for last many years. The Company has now undertaken an exercise to upgrade the machinery and remove bottlenecks in the production processes. Augmenting the fund requirements for the capital expenditure would be critical to timely and successful implementation of the plan. The Company is working on various alternatives for the purpose and is confident to meet the requirements. Moreover, the changed scenario would also work favourably for the Company in terms of its increased creditworthiness for working capital facilities.

**OPPORTUNITIES:**

After successful implementation of debt settlement scheme, Company is hopeful of positive impact going forward as stated above. GST implementation may also provide a boost to the domestic demand of textiles. Moreover, demonetization and softening of interest rates is likely to make the fund availability economical for the Company and it can be used to gain technological edge with regard to product innovation and development. With the right Government policies and GST implementation, we believe that the Indian Textile Industry is well poised to benefit from the large opportunity offered in the domestic and export market.

THREATS, RISKS AND CONCERNS:

The biggest challenge facing the Indian textile industry is competition from the other low cost neighboring countries which attract more business from the international market because of lower production costs, ease in doing business and easier trade routes. Continued strengthening of the rupee against major global currencies over last two quarters is also working against the price competitiveness for the Company. High volatility in the cotton and yarn prices during the last entire year posed a major hurdle in taking any long term stand with the suppliers or the customers. Good quality of yarns at competitive prices, adequate working capital availability, govt. policy and domestic market scenario upon GST implementation are likely to pose major challenges.

INTERNAL CONTROL SYSTEMS:

The Company has an Internal Control System commensurate with the size, scale and complexity of operations across all the areas and processes. The internal control system is periodically reviewed by the Audit Committee. To maintain its objectivity and independence, the Internal Audit function has been outsourced and it reports to the Chairman of the Audit Committee of the Board. The Audit committee members also review and evaluate the internal financial control and risk management systems periodically.

RESEARCH AND DEVELOPMENT:

In the constantly changing business scenario the research and development plays an integral role in the life cycle of a product. Recognizing this, the Company has been continuously trying to maintain and update its product designing and development facilities despite resource limitations. It is maintaining its focus on product innovation and development in order to ensure that its products meet high standards of quality to satisfy customer requirements as well as to achieve cost efficiencies.

HEALTH, SAFETY AND ENVIRONMENT:

The Company considers Health, Safety and Environmental as an integral and essential part of its way of business. The Company understands the importance of having a healthy workforce and safe work practices. The Company adopts suitable work practices to maintain high standards of the safety. Adequate steps are taken on an ongoing basis aimed at safe and comfortable working conditions for staff and workers. The safety committee of the Company has been taking various initiatives in the matter from time to time. The Company also complies with regulations relating to environmental and emission norms.

Actual results may differ materially from those expressed in the statement. The operations of the Company could be influenced by various factors such as domestic and global demand and supply conditions affecting sales volumes and selling prices of finished goods, input availability and cost, government regulations, tax laws, economic developments within the country and other factors such as litigation and industrial relations.

6. A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of

management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

7. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
