

India likely to add 33.9 mn jobs to its workforce by 2028 in AI era

New Delhi, Nov 13 (IANS) With AI-driven transformation, India is projected to increase its workforce from 423.73 million in 2023 to 457.62 million by 2028, a net gain of 33.89 million workers, according to a report on Wednesday.

Emerging technology will transform talent across India's key growth sectors, generating 2.73 million new tech jobs by 2028, according to new research by AI platform for business transformation, ServiceNow.

The research, commissioned from the world's leading learning company, Pearson, showed that the retail sector is set to lead employment growth, requiring an additional 6.96 million workers to fuel its expansion.

This is followed by manufacturing (1.50 million jobs), education (0.84 million jobs) and health-

care (0.80 million jobs) sectors.

"AI will be a key catalyst for job creation across India's growth engines, particularly in roles requiring advanced technical

skills. This strategic emphasis will not only create more high-value opportunities for professionals but will also empower them to build enduring digital careers," said Sumeet Mathur, SVP and Managing Director, ServiceNow India Technology and Business Center.

Tech-related jobs are growing across industries and leading this trend are software application developers, with an expected increase of 109,700 positions. Other notable roles include systems software developers (48,800

new jobs) and data engineers (48,500 new jobs).

Web developers, data analysts and software testers are also on the rise, with projected additions of 48,500, 47,800, and 45,300 roles, respectively.

Additionally, roles such as data integration specialists, database architects, data scientists and computer and information systems managers are expected to see increases ranging from 42,700 to 43,300 positions, the report mentioned.

"Key tech roles were evaluated at a task level to explore how the impact of emerging technologies differs across them. Among these, Systems Administrators will experience the largest shift, with 6.9 hours of their weekly tasks automated or augmented by emerging technologies," said the report. AI Systems Engineers will also benefit significantly from Gen AI, with half of the total tech impact on this role coming directly from AI technologies.

South Korea to address Trump-related uncertainties, upgrade FTAs

Seoul, Nov 13 (IANS) South Korea will proactively address changes in the global trade environment ahead of the launch of the new US administration, while upgrading existing trade pacts with key partners to maintain upward momentum in exports, the industry ministry said on Wednesday.

The Ministry of Trade, Industry and Energy made the announcement in a report marking the start of the second half of the Yoon Suk Yeol administration, unveiling plans to sustain export growth, which has continued for 13 straight months through October.

In the report, the ministry emphasised that the government will focus on addressing uncertainties surrounding the launch of the new Donald Trump administration, which has hinted at protectionist trade policies, including a

minimum 10 percent blanket tariff on imports, reports Yonhap news agency.

"While promptly addressing changes in the trade environment following the US election result, the government will also reach out to U.S. officials to ease uncertainties for businesses investing in the United States," the ministry said. South Korea also plans to diversify its trade portfolio by securing additional free trade agreements (FTAs) to mitigate global trade uncertainties. "Uncertainties in the trade sector have been rising due to geopolitical tensions and the expansion of protectionism, posing lingering challenges to South Korea's economy and industry," the ministry report said. Under the plan, South Korea will seek to upgrade existing FTAs with Britain, Chile and the Association of

Southeast Asian Nations, while continuing negotiations for economic partnership agreements with Mongolia, Thailand, Tanzania and Serbia. Touching on the semiconductor industry, the backbone of Asia's fourth-largest economy, the ministry said it will implement 17 trillion won (\$12 billion) in low-interest loans for semiconductor firms without delay. The amount is part of a 26 trillion-won comprehensive support package announced by Yoon in May to bolster the key industry amid intensifying global competition.
